

**Chesapeake Bay & Watershed Initiatives** - We have committed numerous resources to assist the State's efforts to restore the Bay and the watershed.

- **Shoreline Grasses:** Developed from seed collection through the growing process and culminate with planting. These grasses provide a filter and an anchor for habitat protection and prevent erosion.
- **Marylanders Grow Oysters:** Constructed over 4,000 oysters cages that were given to citizens living along the Tred Avon River to use on their own piers to help rejuvenate oyster populations.
- **Marylanders Plant Trees:** Cultivated and planted hundreds of acres of forest and wetland plants to meet mitigating requirements to slow water runoff into the Bay, along with reforestation of disturbed land from development.
- **Agriculture** - Expanded our agriculture program to include 45 acres of field crops, along with our existing apple tree orchard. These fruit and vegetable harvests will supply many local correctional institutions.

*Improving quality of life  
with products you can trust.*

*MCE's programs provide responsibility, education, and training for our offender employees to care for our natural resources, while giving something back to the community. Our vision is about moving forward to build a mutually sustainable future that generations can enjoy.*

- **Furniture Restoration** - This service allows for the refurbishment of timeworn furniture instead of purchasing new. Some options include green or recycled fabrics on seating, or the stripping and staining of wood furniture.
- **GREENGUARD** - As a certified manufacturer of the GREENGUARD Certification program, many of our products have been rigorously tested and GREENGUARD Indoor Air Quality Certified.®
- **Surplus Removal/ Disposal** - This service shows our dedication to protecting natural resources by recycling unwanted furniture that would usually end up in Maryland landfills.
- **Offset Printing** - We use soy and water based inks and low toxicity chemicals in our print processing.
- **Paper & the Environment** - We support the sustainable efforts of SFI (Sustainable Forestry Initiative) and the FSC (Forest Stewardship Council) by partnering with certified suppliers under these programs. Recycled paper with varying amounts of post consumer content are also available to help support our vision and position as a environmentally conscious print provider.
